- ✔ Code structure & architecture
- ✔ Web performance optimization
- ✔ Front-end & back-end web development
- ✔ Test driven development
- ✔ Agile software development
- ✔ Source control

PROFESSIONAL EXPERIENCE

El mundo del Juguete

Warehouse worker Apr 2020 - Oct 2021

- Managed over other warehouse workers, and worked with team members to enhance productivity.
- Maintained, inspected and organized the warehouse
- Loaded and unloaded packages in a fast-paced warehouse environment.

RELEVANT PROJECTS

Vivero Henry

- Developed e-commerce platform, Vivero Henry, using modern technologies (React, Redux, Node.js, PostgreSQL) and deployed on Vercel and Railway.
- Collaborated with a talented team in all aspects of the project, from UI design to backend API development, and integration of payment and shipping services.
- Gained valuable real-world experience, collaborating with team members, using version control (Git, GitHub), and solving complex challenges with innovative solutions.

Dogs CRUD

- Developed Dogs CRUD, my first full CRUD application using React, Node.js, Express, and PostgreSQL.
- Implemented secure and efficient CRUD operations, including authentication, data validation, and error handling.
- Gained valuable experience with the PERN stack, RESTful APIs, and full-stack web development, sparking a passion for building web applications.

EDUCATION

Nov 2022 - Mar 2023 | Henry Bootcamp

Fullstack development. Graduated through hard work and cooperation with other team members. Developed one individual project and a group project, in order to maximize both soft and hard skills
